C. MP Case Files (Summaries) attached (Annex A)

1. (C) MP Case files dealing with investigations conducted into sexual deviancy and homosexuality from 1976 to Dec 1984 have been reviewed to determine the following:

- a. use of rank and authority to effect or influence sexual activities;
- b. the occurrence of violence concomitant with sexual activities;
- c. influence or instigation by Hostile Intelligence Services (HIS) on sexual activities; and
- d. presence of emotional instability indicators by those involved.

2. (C) Twenty-seven case files have been identified and summarized (Annex A) some of which show factors 1a and 1b above. No HIS involvement was detected. Some emotional instability could be inferred from the activities of those directly involved, but without authoritative psychiatric follow-up on each case it is not possible to provide useful comment on this point.
